

```
1 interface Payable {
2     double pay();
3 }
4
5 interface Taxable {
6     double tax();
7 }
8
9 class Employee implements Payable, Taxable {
10
11     double salary;
12
13     Employee(double s) {
14         salary = s;
15     }
16
17     public double pay() {
18         return salary;
19     }
20
21     public double tax() {
22         return salary * 0.10;
23     }
24 }
25
26 public class Main {
27     public static void main(String[] args) {
28
29         Employee e = new Employee(50000);
30
31         System.out.println("Salary: " + e.pay());
32         System.out.println("Tax: " + e.tax());
33     }
34 }
```

Salary: 50000.0
Tax: 5000.0
